## ABOUT ME

Creative and detail-oriented Web Designer & Developer with hands-on experience in HTML, CSS, JavaScript, Tailwind CSS, Django (Python), and MySQL.

Adept at developing responsive web interfaces, integrating backend systems, and ensuring high-quality user experiences.

Skilled in both front-end design and back-end logic, with a solid understanding of web performance, accessibility, and cross-browser compatibility.

## EXPERTISE

- Management Skills
- Creativity
- web designing
- Negotiation
- Critical Thinking
- Leadership

## PROJECTS

### Facebook clone

**Duration: 4 Months**

**Best look like a facebook UI (frontend)**

- Developed a Facebook inspired social media platform using HTML, CSS and JavaScript languages. Designed a responsive UI using with media queries for a better user experience in our phone.

### Amazone-clone

**Duration: 5 Months**

**E-Commerce website like Amazon Clone**

- Developed a full-stack e-commerce Web application inspired by Amazon's user experience.
- Implemented responsive UI using HTML, Tailwind CSS and Java Script for smooth navigation and interactive design.
- Built robust backend functionality with Django, including user authentication, product management, cart system, order placement and payment simulation.
- Integrated dynamic product listings, category filters and search functionality to enhance user engagement.
- Ensured responsive design across devices and optimized page performance for better user experience.

Apart from the Amazon Clone and Facebook Clone projects, I have also developed another project – a CCTV Management System using backend technologies. This project includes advanced features like profile viewing and editing, similar to real-time management systems.
